

Example of Multi-Factor Authentication (MFA) with Duo

Logging into a Duquesne University web application

1 Access a DU web application that is protected with MFA.

2 Sign in your MultiPass username & password.

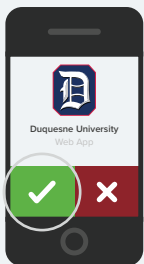

3 Select an authentication method:

- **Duo Push** (mobile device)
- **Call Me** (landline phone)
- **Passcode** (hardware token)

4 Use your selected device to complete the MFA process.

Duo Push

- From your mobile or smart device, you can authenticate with Duo using the **Send Me a Push** option.
- Once the Duo Push is sent to your device, tap **Approve** to complete authentication.

Call Me

- To authenticate via a phone call to your mobile phone or desk phone, select the **Call Me** option.
- You will receive a phone call from **412.396.4357**.
- Press any key on your phone's keypad to complete authentication.

Passcode

- If you are using a Duo hardware token to authenticate, press the button on your hardware token to generate a one-time passcode.
- Select the **Passcode** option under Choose an authentication method.
- Enter the one-time passcode generated on your hardware token and click **Log In**.
